

## Guyco Ball Valves

Full flow design ensures there is minimum head loss

Guyco Ball valves are manufactured from materials that meet Potable Water Standards that are also non-corrosive, UV stabilised, making them suitable for New Zealand conditions.

The valve has a smooth open and close action, featuring a removable handle for safety.

Long BSPT threads allow for better engagement.

### Features

---

High quality true full flow valves.

---

Male and Female options.

---

Removable and interchangeable handles.

---

Made from UV-stabilised high-quality glass-reinforced nylon

---

Pressure rating: 16 Bar/235 PSI @ 20°C.

---

Smooth open and close action.

---
