

Anka Washdown Nozzles

Compact and reliable hose nozzles for any situation

ANKA Hose Nozzles have been designed for a wide range of uses. Using high quality industrial plastics, the ANKA hose nozzles give greater impact resistance.

The large bore 40mm and 32mm are widely accepted in the farm and dairying industry. The extra water volume moves solids quickly and efficiently.

The small 20mm and 25mm hose nozzles are designed for smaller volume washdown.

Features

Fully adjustable; wide spray pattern to a full bore flow.

Quick Action on/off; for complete control.

Uniquely designed outer ring protects the nozzle from high impact and excessive wear.

Serviceable; nozzles can be taken apart for servicing. Service kits available.

Maximum Working Pressure: 7 bar (700 kPa – 100 psi) @ 20°C.
